2. **Q:** What happened?

A chosen: Some fluid came out

Option rests on: dischargesmadhi: "fluid that sometimes comes out"

3. **Q:** Which of these describes the fluid?

A chosen: A man: the fluid called madhī, wadhī or wadī (or I did istibrā' and doubt whether it is urine or one of these)

Option rests on: dischargesmadhi: "called 'madhī'"

Outcome:

The fluid that sometimes comes out of the penis due to sexual arousal, called 'madhī', is pure. The fluid that sometimes comes out after the ejaculation of semen, called 'wadhī', is also pure. As for fluid that sometimes comes out after urinating and which is called 'wadī', it is pure if it has not come into contact with urine. Furthermore, in the event that a man performs istibrā' after urinating and then fluid comes out and he doubts whether it is urine or one of these three fluids, it is pure.
